Dear All,

This letter uses `schoolpaper.sty` to produce UCD School of Mathematical Science headed paper from \LaTeX . It's basically a hack of my `dephead.sty` which was a hack of Wayne's original for plain \TeX , using either a postscript version of Mícheál's mf crest, or the UCD Dublin logo. If you want headed paper from \LaTeX :

- 1) Get the style file `schoolpaper.sty` from <https://mathsci.ucd.ie/docserve?id=7> or ask me to email it to you. Place it where \LaTeX can find it (e.g. the directory in which you're working).
- 2) Put

```
\usepackage{schoolpaper}
\pagestyle{ucd}
```

into your preamble (or `\thispagestyle{ucd}` on pages you want headed).

The variables, which can be changed in the preamble, are

Variable	Default Value	Variable	Default Value
<code>\heademail</code>	mathematics@ucd.ie	<code>\heademailname</code>	E-mail
<code>\headextn</code>	2580	<code>\headextnname</code>	Tel
<code>\headurl</code>	http://www.maths.ucd.ie/	<code>\headurlname</code>	Web
<code>\headfax</code>	1196	<code>\headfaxname</code>	Fax
<code>\headlogo</code>	logo		

You change these with e.g.

```
\headurl{www.myhomepage.com}
\headfax{*}
```

An asterisk means the line is omitted from the header. There are some logos built in—Mícheál's metafont produced crest `mf`  and the new logo in colour and mono; `logoCOL`

which looks like  and `logoBW` which looks like . In fact you can include any eps figure you want, provided \TeX can find it. Please feel free to improve this style file (for which you should read, "Please improve this style file".)

- Michael
