

Meteorology Seminar

Title: Weather Forecasting Models in Met Eireann

Speaker: Eoin Whelan

Date: Tue 3rd April 2012 at 12:00PM

Location: Mathematical Sciences Seminar Room (Ag 1.01)

Abstract: An overview of weather forecasting models run by Met Eireann will be presented. These models are used by operational forecasters for weather forecasting as well as by commercial and scientific users for applications. Current Met Eireann model configurations and uses will be discussed and the accuracy of these models will be described.
