Analysis Seminar

P. Tradacete (Madrid Carlos III)

will speak on

On the least doubling constant of a metric space

Tue 27th February 2018 at 4:00PM

Location: SCN 125

We will explore the question of determining the least doubling constant among all doubling measures defined on a metric space. We will show that in many natural instances this constant is at least 2. This is based on work in progress with J. Soria (Barcelona).

This talk is part of the **Analysis** series. For more, see
