Analysis Seminar

K. Piszczek (Poznan)

will speak on

The noncommutative Schwartz space. Is it interesting?

Tue 16th February 2016 at 4:15PM

Location:

The question 'What is the noncommutative space of smooth functions' has been of interest for some time. We will focus on a concreteobject that might play such a role. Motivation towards the researchand properties of this object will be considered. In particular,we will try to describe some amenability properties of thisnoncommutative Frechet algebra.

This talk is part of the **Analysis** series. For more, see
