Title: Free boundaries arriving from semi- and quasilinear PDEs

Speaker: H. Shahgholian (KTH)

Date: Tue 21st April 2015 at 3:00PM

Location:

Abstract: In this talk I shall review some classical free boundary problems, as well as a few new ones, arising in semi- and quasi-linear problems. I shall present a general framework for how the regularity theory works in such problems.
