Analysis Seminar

Christopher Boyd (UCD)

will speak on

Localisation and Positivity of Orthogonally Additive Polynomials

Tue 6th November 2018 at 4:00PM

Location: Seminar Room SCN 1.25

We show how the localisation technique allows to characterise orthogonally additive polynomials which are the power of a linear functional and to bound the norm of the absolute value of an orthogonally additive polynomial, P , by the norm of P .

These results are joint work with R. Ryan and N. Snigireva (NUI Galway).

This talk is part of the **Analysis** series. For more, see
