

Analysis Seminar

Title: Norm attainment and isometries

Speaker: Richard Aron (Kent State University)

Date: Tue 22nd October 2024 at 3:00PM

Location: E0.32 (beside Pi restaurant)

Abstract: We investigate instances of when isometries between Banach spaces do not preserve norm-attaining points. We will discuss this in light of recent work with Jose Bonet and Manuel Maestre, and we will review older work on Lipschitz functions by Miguel Martin, Vladimir Kadets, and Mariia (sic) Soloviova.
