K-Theory, Quadratic Forms and Number Theory Seminar

Dr. Ciaran Mac an Bhaird (NUIM)

will speak on

Gauss' Method for determining cyclotomic numbers

Wed 21st November 2007 at 4:00PM

Location: Mathematical Sciences Seminar Room

We will discuss how Gauss' method leads to a series of functional equations. We have necessary and sufficient conditions for these equations to have integer solutions. This leads to a purely Diophantine system of equations, the number of equations is independent of the prime p , where p is congruent to 1 modulo l . The system has precisely $\phi(l)$ solutions, which correspond to the cyclotomic numbers of order l . Using this method, we will go through the cyclotomic numbers of order 3, 5 and 7 and discuss some interesting aspects of these and further orders.

This talk is part of the **K-Theory, Quadratic Forms and Number Theory** series. For more, see <https://maths.ucd.ie/seminars>
