

Analysis Seminar

Title: Exponential polynomials and associated Hankel matrices

Speaker: Hermann Render

Date: Tue 16th September 2025 at 3:00PM

Location: E0.32 (beside Pi restaurant)

Abstract: Exponential polynomials are used in modern CAGD for creating Bezier-type curves. In this talk we present a short survey and discuss two classes, the cycloidal space C_n and its associated class P_n which have been investigated by J.M. Carnicer, E. Mainar and J.M.P.
