Analysis Seminar

Title: The Complexity of Isometry Classes of Banach Spaces, with emphasis on C(K) Spaces

Speaker: Marek Cúth (Charles University, Prague)

Date: Tue 10th February 2026 at 3:00PM

Location: E0.32 (beside Pi restaurant)

Abstract: During the talk I would like to give a short course on potential applications of descriptive set theory in Banach spaces. At the end of the talk I will mention our recent work in progress concerning isometric classification of C(K) spaces, where K is a countable compact.
