Title: Second class particles just walk sometimes

Speaker: Márton Bálahz (University of Bristol)

Date: Wed 16th September 2026 at 2:00PM

Location: N0.20 - Science North

Abstract: I will review some old and not so old results about second class particles going crazy and performing simple random walk sometimes. This is really out of their usual character which is typically self-interacting hence far more complicated than a simple random walk.

Joint work with Gyorgy Farkas, Peter Kovacs, Attila Rakos; Lewis Duffy, Dimitri Pantelli.
