K-Theory, Quadratic Forms and Number Theory Seminar

Dr. Sander Zwegers (UCD)

will speak on

Mock modular forms

Wed 19th November 2008 at 3:00PM

Location: Mathematical Sciences Seminar Room

In this talk we'll discuss some aspects of the theory of mock modular forms. We provide a general definition, some examples, like Ramanujan's mock theta functions and certain indefinite theta functions, and a generalization.

This talk is part of the **K-Theory, Quadratic Forms and Number Theory** series. For more, see
