

Seminar

K-Theory, Quadratic Forms and Number Theory

Title: Ramanujan and the theory of modular forms

Speaker: Professor Heng Huat Chan (National University of Singapore and MPIM)

Date: Wed 30th September 2009 at 3:00PM

Location: Mathematical Sciences Seminar Room

Abstract: In this talk, I will first introduce the Indian mathematician Srinivasa Ramanujan. I will then present several results of Ramanujan's mathematics that have close connections with the theory of modular forms.
