

## Applied and Computational Mathematics Seminar

**Title:** Application of AdS/CFT in condensed matter

**Speaker:** Eoin O Colgain, Korean Institute for Advanced Study

**Date:** Thu 25th March 2010 at 2:15PM

**Location:** Mathematical Sciences Seminar Room

**Abstract:** The talk will review the way string theory ideas can be used to study features of superfluidity. This is becoming an active area of theoretical condensed matter research. The talk will not assume previous knowledge of the Ads/CFT correspondence.
