Analysis Seminar

R. Gohm (Aberystwyth)

will speak on

Multi-variable operator theory and noncommutative probability

Tue 19th April 2011 at 2:30PM

Location: TCD 2.6

We suggest some promising connections between these fields and illustrate our point by discussing in some detail the recently introduced transfer functions for noncommutative Markov chains which are in fact multi-analytic operators in the sense of G. Popescu.

This talk is part of the **Analysis** series. For more, see
