Analysis Seminar

Title: Multi-variable operator theory and noncommutative probability

Speaker: R. Gohm (Aberystwyth)

Date: Tue 19th April 2011 at 2:30PM

Location: TCD 2.6

Abstract: We suggest some promising connections between these fields and illustrate our point by discussing in some detail the recently introduced transfer functions for noncommutative Markov chains which are in fact multi-analytic operators in the sense of G. Popescu.
